

4-COUNTY Cooperative Weed Management Area

2020 Call for Observations

The 4-County Cooperative Weed Management Area (CWMA) is requesting geographic distribution data on the four species listed below. The 4-County CWMA committee members evaluated and selected each of these “Call for Observations” species based on the following criteria: (1) current knowledge, or lack thereof, of its presence and extent in the region, (2) invasive potential in the region, and (3) invasiveness in other states or countries outside its native range.

We encourage you and your organization to contribute observations of invasive or naturalizing populations of these species within the 4- County CWMA region! Widening the diversity of sources of data will go a long way in bettering our understanding of the distribution of these species and their potential ecological and economic risks in the region. We will track of our data collection progress throughout the year at 4-County CWMA General Meetings.

- Within Oregon, please contribute data to iMapInvasives Oregon_by contacting Lindsey Wise at imapinvasivesoregon@gmail.com and visiting <https://www.imapinvasives.org/>.
 - Within Washington State, please send reports to <http://eddmaps.org>.
- (Both platforms accept individual observations and bulk uploads)
- iNaturalist.org and Oregon Invasive Species Hotline are great reporting methods as well. Reports to these sources periodically get integrated into the iMapInvasives Oregon dataset.

Please contribute data by December 1, 2020 (click [HERE](#) for a Google Calendar reminder). If you have questions about this request, please contact Tyler Pedersen at tyler.pedersen@tualatinswcd.org.

Target Species

- ***Torilis japonica* - Japanese hedgeparsley**
 - [Japanese hedgeparsley Research Paper \(2014\)](#)
 - [Minnesota Wildflowers Japanese hedgeparsley](#)
 - [Invasive Plant Atlas of the US Japanese hedge-parsley](#)
- ***Euphorbia oblongata* - Oblong spurge**
 - [Clackamas SWCD Oblong spurge profile](#)

- ***Impatiens balfourii* - Balfour's balsam**

- [Impatiens of the Pacific Northwest](#)
- [DNR Wisconsin Balfour's touch-me-not](#)

- ***Tribulus terrestris* - Puncturevine**

- [University of California Weed Research & Info Center](#)
- [Clackamas SWCD Puncturevine Weed of the Month](#)

Euphorbia oblongata – Clackamas SWCD staff

Impatiens balfourii – Jeff Lesh

Tribulus terrestris - Howard F. Schwartz,
Colorado State University, Bugwood.org

Torilis japonica - Dan Tenaglia,
Missouriplants.com, Bugwood.org
